

D20 Deepots

The **Deepot™** D20 and D50 trays each denote the number of cells per tray. Deepots are used for a wide range of hardwood and other tree seedlings and are available in seven sizes. All are an excellent choice for plant material requiring a deeper root ball. They also allow seedlings to be spread out or consolidated for sorting and maximizing growing density.

Recycled D40 cells are manufactured of post industry, pre-consumer recycled polypropylene resin. Color may vary.

Light Weight (L) Recycled (R) Heavy Weight (H)
Some cells are available in white color for use in outside rows.

Cells

* Cell orders of less than 1,000 are welcome.

Support Trays allow easier cell consolidation for full utilization of growing space.

D20T

D20C

N25T

The patent pending **Nova-25 Tray** (N25T) is an economical support tray which utilizes 3/4" PVC pipe as legs. This allows the user to determine the height of the tray. With legs removed, the trays nestle for very economical and compact shipping and storage. PVC pipe is not included.
