

# Flow Trays

**Flow Trays** provide sub-irrigation for plant material which are difficult to water overhead. Large Flow Trays are designed to contain four RL98, RL200, D50 trays, or six D20 trays. New light weight tray (FLSLITE) is an economical alternative to the small Flow Tray (FLS). Small and medium Flow Trays hold one tray. Flow Trays are made of sunlight resistant plastic and are very durable. *Trays and cells are sold separately.*

**FLSLITE**
