

Grower Resources

Forest Nursery Notes, The Container Tree Nursery Manual, and the Native Plants Journal

The Reforestation, Nurseries, and Genetics Resources (RNGR) team of the USDA Forest Service offers several technology transfer services to people growing forest trees and other native plants. One is a semi-annual news and literature service called **Forest Nursery Notes** that is available for free—send your address to Tom Landis at nurseries@aol.com. Another is a seven-volume series of books called **The Container Tree Nursery Manual** that can be purchased for the prices below. For a very reasonable subscription fee, you can learn all about the growing and uses for native plants in the **Native Plants Journal** which is published three times per year. You can view past issues and subscribe at www.nativeplantnetwork.org. For more information on these and other publications, please visit the RNGR Web site: www.rngr.net.
