

# HIKO Tray System

HIKO™ trays are used in forest nurseries worldwide for the production of quality seedlings and cuttings. All HIKO trays are made of high-density plastic and are durable, recyclable and easy to clean. The trays have a lifespan of more than ten years. All tray cavities have vertical root training ribs and/or side slits. Side slits assure good aeration of the roots and create active root tips. The cell design of the HV90AB has side slits and active root guiding along the sides of the root ball.

*A minimum order of 2,500 trays is required if not in stock.*

## Trays

ID CODE	CAVITIES per tray	CAVITY DIAMETER in.	CAVITY DEPTH in.	WIDTH in.	LENGTH in.	CAVITY VOLUME cu. in.	ml	CAVITIES PER sq. ft.	PRICE per tray
