\* Z10T will hold 40 2" plant bands.

Please recycle. ♻️

**Zipset™ Tree and Vine Wraps** help newly planted vines or seedlings adapt to the vineyard or orchard environment upon transplanting. They help protect the plant from excessive sunrays and wind, deflect heat, deter rodents and guard against herbicide spray, assuring a more uniform crop.

The Zipset wraps are made from poly-coated bleach board—an ideal material for extreme environmental conditions that lasts between 18 and 24 months. They are available in two styles: a heat-sealed drop-on or a staple-on wrap, which may be required for plants with larger canopy development. Each style comes in several sizes but the most common protectors are 3.75" square and 20" or 24" tall for vines and 2.75" square and 18" tall for nut and fruit tree growers.

## Wraps

ID CODE	WRAP SIZE in.	PRICE PER BUNDLE OF 100
